Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want to network confidently. • I need better conversation starters. • I don't know how to approach professionals.		THINKS • What if I say the wrong thing? • I hope I make a good impression. • I need reliable information to discuss.
	<i>College Student (Networking Event Participant)</i>	
DOES • Attends networking events. • Searches topics before events. • Uses AI tools for preparation.		FEELS • Nervous before networking. • Curious to learn from professionals. • More confident after using the assistant.
