Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>Presentation Layer</i>	Provides the user interface for entering profile and event details and displaying conversation starters.	<i>Streamlit</i>
<i>API Gateway</i>	Receives requests and routes them to backend services.	<i>FastAPI</i>
Microservices	Generates conversation starters and performs fact verification.	<i>DistilBERT, GPT-2, Wikipedia API</i>
<i>Database</i>	Stores user profiles, session logs and conversation history.	SQLite
