

Technology Stack

Date	05 July 2026
Team ID	
Project Name	Personalized Networking Assistant
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	Streamlit	Simple and interactive web interface for users.

2	Backend / Server-Side	Python + FastAPI	Fast backend API and request handling.
3	Database / Data Storage	Local JSON Files	Stores user history and feedback locally
4	Cloud / Hosting / Deployment	Local Deployment	Easy development and testing on local machine.
5	Version Control & CI/CD	Git & GitHub	Version control and project collaboration.
6	Third-Party APIs / Other Tools	Wikipedia API, Hugging Face Transformers (DistilBERT & GPT-2)	Fact verification and AI conversation generation.
